Press Release (CEER PR 23-17)

Vienna, 29 November 2023

CEER and Energy Community Secretariat organise joint regional workshop on self-consumption regulation for Eastern Partnership countries

Within the framework of the EU4Energy Programme – "Promoting the Clean Energy Transition in the Eastern Partnership Countries" – the Council of European Energy Regulators (CEER) in cooperation with the Energy Community Secretariat (EnCS) is conducting a two-day regional workshop on **Bringing Self-Consumption Regulation of EaP Countries in Line with European Union and Energy Community Requirements**.

The event brings together employees of energy regulatory authorities, line ministries, agencies, distribution system operators, suppliers and other decision-making bodies from Armenia, Azerbaijan, Georgia, the Republic of Moldova, and Ukraine. The primary objective is to enhance their knowledge about EU and Energy Community requirements on self-consumption regulation, as well as to contribute to the approximation of the national legislation of the EaP countries with EU and Energy Community requirements.

Experts from CEER and EnCS will deliver presentations on the Energy Community and EU best practices regarding self-consumption and the promotion of prosumers and energy communities. Participants of the workshop will also have the opportunity to visit Europe's largest and innovative energy research project in Vienna – [Aspern Smart City Research](#) (ASCR) – and acquire practical knowledge of how it operates.

Funded by the European Union, the EU4Energy programme is a collaborative effort between the Council of European Energy Regulators, the Energy Community Secretariat and the International Energy Agency.
